## References

When it comes to quick, elegant and precise design request, there is no one better than Mr. Gurjar to execute them. Having worked with him for more than 2 years now, I have started respecting his patience. I may have a random, vague idea in the back of my mind, of which even I am not really sure of, but he would patiently listen to all my ramblings and solve the verbal jigsaw into a professional looking design. It's always a pleasure collaborating with you, keep up the good work.
